To create a script with a text editor, enter

EDIT followed by the name of the file to edit or create, for example:

EDIT SALES. EDIT adds the filename extension .SQL to the name

unless you specify the file extension. When

you save the script with the text editor, it

is saved back into the same file.

Using Scripts in

SQL\*Plus

The last attribute

file\_existsdenotes

whether the file handle

points to an existing

file. If not all other

attributes except the

file\_pathand the

file\_nameare NULL.

Example I: Obtaining a

file handle for the /tmp

directory (see

documentation for

FILE\_PKG) SQL> select

```
file_pkg.get_file('/tmp')
```

```
from dual;
```
