investigation, and management of afferent (visual), efferent (eye movement), eyelid, pupil, and orbital disorders. Each chapter provides a discussion of the diagnosis, key points to remember, and selected references for further reading.

## **Neuro-Ophthalmology - Oxford Medicine**

As in any field of medicine, the neuro-ophthalmic history guides the physician's examination and differential diagnosis. From the beginning of the history taking, the physician should attempt to categorize the patient's problem. This chapter reviews the various elements of the neuro-ophthalmic history in the context of neuro-ophthalmic disorders.
