If the diesel engine won't start, but turns over quickly on the starter motor, then a fuel problem - as above - is the most likely cause. However, in cold weather it's worth checking the glow plugs: these are pre-heaters fitted to most diesel engines to warm the air in the intake to improve cold starting.

Diesel engine repairs: fuel, air, starting, wiring - boats.com

With engines giving 64-225 kW (86-300 hp), there's a Perkins propulsion engine for your marine needs - and one that meets the emissions standards of the territory in which you'll be operating. Our engines also provide auxiliary power (12.3-218 kW/13.8-275 kVa) to generate the electricity for lighting, pumps and haul net equipment.

Perkins range of marine diesel engines | Perkins

On most of these panels the entire current of the alternator runs through upwards of 25' of 10GA wire and two ridiculously pathetic trailer type connectors, for this type of load. The undersized wire and trailer connectors trying to pass 45A+ creates a large amount of resistance as these boats age.
